

We invite clubs to join the pilot group

VIGRI is a fintech mobile application – a live registry and feed of verified sports and creative clubs, individual athletes, dancers, and creative personalities.

For the first wave, we are looking for 10-20 clubs ready to join the pilot at an early stage and help us build a strong product together.

Website:

<https://vigri.ee/clubs>

What is VIGRI

VIGRI is an application for discovering and following sports and creative clubs, as well as individual athletes, dancers, and creative personalities.

Here, users can find clubs and individual participants by city, discipline, and level, and follow their development, news, and real stories.

VIGRI is not just a messenger and not only a support platform. It is a live registry and feed of verified participants with practical tools for support, engagement, and participation in their development.

How VIGRI works

The club gains visibility, a new audience, and new opportunities for support.

The pilot gives a club more than just presence, it provides a working digital framework

- **Verified club page**

The club can be found in the shared registry by city, discipline, and level. It creates a clear entry point for new students, parents, supporters, and partners.

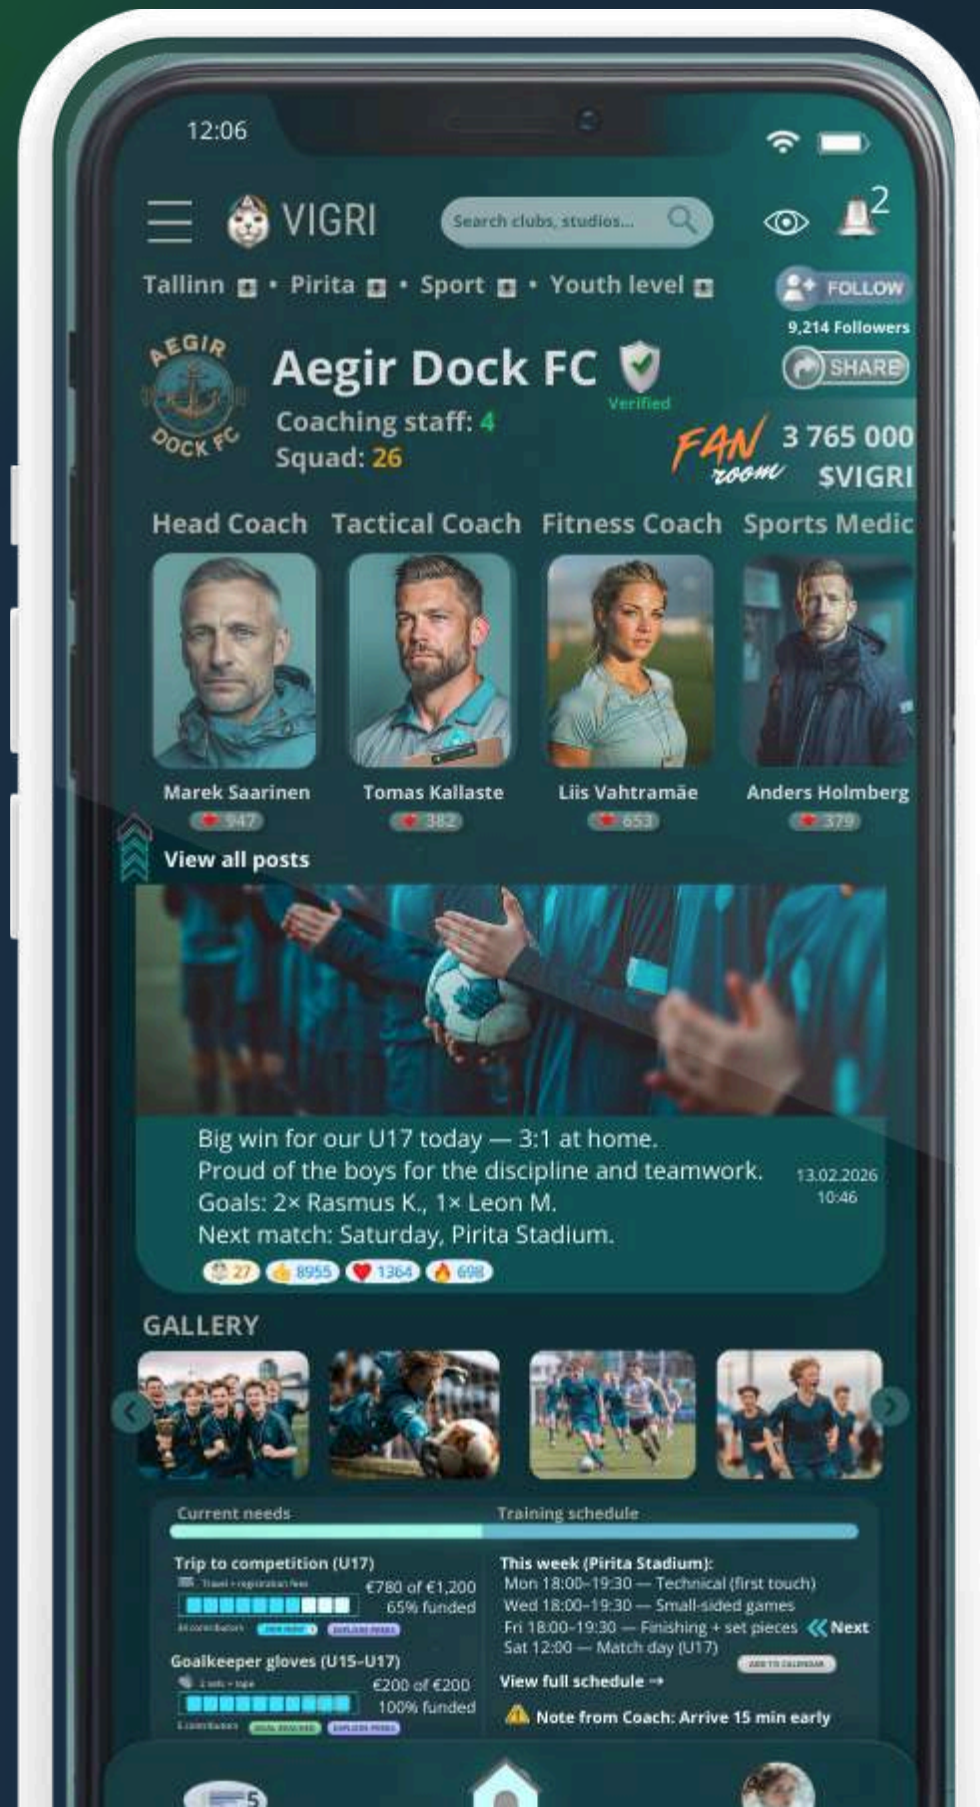

- **Club feed**

News, results, photos, and key stages of the season are brought together in one place. It becomes easier for people to follow the club's journey without getting lost between chats and social media.

- **Engagement and financial support**

The club can openly show its needs, gather support for trips, camps, and equipment, and also offer merch, tickets, and special activities.

This is not just another chat and not just a directory. We want to create a live, clear, and useful digital environment where a club is easier to find, understand, and support.

HOW THE PILOT WORKS

A small closed group of clubs – a joint launch of the first working version of VIGRI.

What we provide

- onboarding and setup of the club page
- priority support for the first wave
- feature improvement based on the real needs of clubs

What we need from the club

- a basic profile and first materials
- regular updates about the life of the club
- honest feedback on the process and functionality

The public project website is already working as an entry point to VIGRI. The application itself will be launched separately – together with the first pilot group of clubs.

2026

Over the next 6-9 months, we will start with 10-20 clubs, set up their pages, launch a working prototype, and continue improving it together with the first wave of participants.

Right now, we need a strong first circle of clubs to help us build a clear and useful product together.

If this format feels right for your club, we would be glad to discuss participation in the first pilot group.

FIRST WAVE OF CLUBS
